AGRICULTURAL

Hog Cholera.

We do not pretend that the cholera when ones firmly seated can be cured. but we unbesitatingly affirm that if prompt measures are taken, when the lisease first appears in the herd, a large majority of the hoga may be saved. We say hoge, knowing that young pige when taken sick from any cause can only be saved by a miracle. As soon as the disease shows itself in the herd, attention to the following particulars are imperative:

1. Remove the sick animals from the pen to comfortable quarters, and provide the herd with fresh bedding and ample protection from the weather. 2. Avoid feeding corn in any form. Feed the sick animals milk exclusive- so it always is with people who comdlings, and the entire herd with shorts, right manner,-Farmers Friend. middlings, ground outs or rye. If the food can be cooked so much the better.

3. Let the entire herd have ready access to pure water, and keep constantly in the yard a pile of charcoal

4 Keep in mind constantly this supply of nitrogenious food.

makes the corn crop only two per cent. southern, twenty-four in the Ohio basin, and twenty-nine west of the Missisppi. The product of the south is 10,000,000 bushels greater than that of last year; that of New England 300,000 bushels greater, and there is less in the middle and western states. The states producing less than in 1875 are New Hampshire, Rhode Island, those on the Astlantic coast from New York to North Carolina Missispin. York to North Carolina, Missisippi, Tennessee, Michigan, Illinois, Iowa and Missouri. Illinois is credited with nearly 250,000,000 bushels and Iowa with 155,000,000. Next in rank are Ohio, Indiana, Missouri and Kansas. These six states produce six-predisposed to plant his fore feet in the

A run in a stuble field when the horse does to his manger. A run in a stuble field when the ground is bare, or the snow is only three or four inches deep, will be of advantage to the sheep. Any weakly ones should be turned out by themselves, in a place where they can be looked after. A constant watch should be kept over the flock, lest one should fell into a furrow or deele and be when they can be looked after. A constant watch should be kept over the flock, lest one should in the clear, the trough will hold all the sould should shoul be kept over the flock, lest one should fall into a furrow or drain and be unable to recover itself. Ewea may thus be lost if neglected. Never fail to count the sheep when they go out and come in. Never compel them to jump over bars, but move the lowest one is accidently broken. If a sheep's leg is accidently broken, bandage it with splints, and keep it by itself a week or two, until the fracture is repaired, two, until the fracture is repaired, trough, with the lower end of the flap which is easily done without any dres- hanging in the trough, so that it can beaven. sing or other treatment. Beautify Tour Homes.

that it is money thrown away to beauwithout paint, or with one coat in a lifetime, with no blinds, no pleasant The Owensboro mail, via. Beda. Bu- door-yard, no tasty fences around the be cut for hay, or it may be pastured repair, out-houses in a state of decay, fences in poor condition, and the genthere it will continue to hang, probably, another sign: "This place for sale." and here thay find order, taste, and neatness prevailing-a beautiful cottage, or other style of house, out-buildfind an abundance of strawberries, one passed, in regard to its adornments. What was done to beautify it, was imperfect mode of threshing and pas-PIANO done by degrees, and the expense was never felt as amounting to much; and

On The Use of Mules.

more than twice as long as horses, which he was cured. He says: "Go invears old to thirty. At twelve a horse alone, get some book that will interest but not excite you, and sit down and general truth; the hog is a cleanly down hill, but a mule at that age has brute which enjoys and pays for clean scarcely risen out of his childhood, and quarters, and especially his nature, no goes on improving until he is twenty. ess than man's, demands a proper Instances are recorded of mules living sixty and seventy years, but these are Only a week ago we heard a careful exceptions. The general rule is that read slowly and distinctly, moving the farmer and a well known Berkshire they average thirty. Mules are never lips but not the teeth Then, when conbreeder assert that, after much experi- exposed to disease as horses are. Im- versing with others, try to speak as slowence, he had no longer any dread of hog cholers, for he could cure it with new milk. mense amounts of money are annually spirited horses by accident and disease The Country's Corn Crop.

Mules have organs of vision and hearing far superior to those of the horse. Hence they seldom frighten and run off. A horse frightens; but a mule, having superior discernment, both by the eye and ear, understands everygreater than the crop of 1874. The thing he meets, and therefore is safe. aggregate, subject to possible revision, is 1,205,000,000 bushels. Less than one per cent. of the crop is raised in New England, scarcely six per cent. ous regions, and on dangerous roads. marked it. I repeated the remedy every in the We doubt whether on the Alpine paths five or six days for a month, and then at in the middle states, twenty in the southern, twenty-four in the Ohio bavery important fact is, that in the mat ter of food a mule will live and thrive on less than half it takes to keep a horse.-Ex.

many farmers have done, that a hog is tear herself open and fall to the ground. Kansas. These six states produce sixtenths of the total product. Tennessee, which once held the highest rank in the country, now stands first in the southern states, followed by Texas, Alabama and Georgia. In quality the crop is superior to its predecessor.

There has been an increase in area in all sections, aggregating about 2, 000,000 acres; the advance being very slight in the gulf states from Alabama to Louisiana, and scarcely perceptible in the middle states. It is largest west of the Missouri. Wisconsin shows the heaviest rate of increase in the northwest, and Georgia in the south. The average price of corn per bushel is the highest in Massachusetts, and lowest in Kansas. ninety-five and twenty-three cents respectively.

These six states produce six predictions in the fore feet in the trough its no more inclined to put his feet into his forward feet in the trough than a horse is wont to put his feet into his manuer. The great fault is in the construction of the hog's trough. Almost always the trough is so deep and the front sides so high that the feed can not be reached by three men on horseback. They asked them the way to and distance to the ford of the river. The horsemen told them to follow and they would show them the way. They reached the river a tittle before night fall, the horsemen first, and when my brother and his wife came up, found them gathered around some object by the aide of the road. Approaching them, they found two arms of a human being, apparently those of a woman, with the thumbs drawn in toward the palms, just as she saw them in ber dream. resting his throat on the edge of the trough, and he will stand up to it as a

other. By this arrangement the flap can be fastened by a bolt to the front side until the feed is put into the

Register of flural Affairs.

It is astonishing to see the lack of The first requisite is to have a good taste around many village and farm field of clover, sown on clean land and houses; and their owners seem to think clear of weeds. This will make all the difference between clean and foul seed. Some weeds are comparatively harmtify their houses; but let them offer their places for sale, and then they will realize the difference between a house the control of their places for sale, and then they will realize the difference between a house the control of the field to clover, let it he cut down closely about the time of he cut down closely about the time of its first blossoming, which at the north house, no shade trees, no fruit trees, no closely. The first mode is rather the beds of flowers, no climbing vines up most reliable. A second growth will spring up and bear an abundant and the porches, no garden worthy of name, no snug, well-painted out-houses, no ripen seed early in autumn. The nicely graveled walks; but in their proper season for cutting is indicated places we often find a dwelling out of when most of the heads have become brown. There are different modes used for cutting. One is to cut the crop with a mowing machine, raking it eral apperance of the place repugnant in to quite small cocks, the drying beto our feelings. We see the old sign: ing assisted by occasionally turning them over, as examination may indicate, with barely a leaf upon it. Another and more systematic Here it has hung for many years, and way is to take a combined mowing and reaping machine, put on the platform, till the owner goes into his grave. sharpen the knives well, and then with Nobody wants to buy such a forlorn- a good hand rake keep the cut crop on looking "home;" and people in search of a country place pass on till they see a large bunch, when it is pushed off. At the next passing drop a bunch at same place so as to make wind-rows. When partly dry, cock it and let the drying process be completed as already described. This plan obvintes raking, ings in perfect repair, fences neat and described. This plan obviates raking good order, shade trees abundant, fruit and leaves the crop in better condition. trees loaded with apples plums cher-ries. In the well-planned garden they at the proper time with a clover huller When a mowing machine can not be raspberries, currents gooseberries, had, the crop may be cut slowly with quinces and grapes; and the place a scythe. If a clover huller can not be suits them, and they purchase it. Now, procured, let the hay become quite this place cost but a little more than the ripe, and if it has been wet, it will shell the better, and resort to the more

sing through the fanning mill. A Cure for Stammering.

A Canada Journal contains a letter from correspondent who professes to have been a stammerer from childhood almost to manhood, and who wishes to give other Mules on a general average, live sufferers the benefit of the treatment by Now Music They are fit for service from three to a room where you will be quiet and read two hours aloud to yourself, keeping your teeth together. Do the same thing every two or three days, or once a week if very tiresome, always taking care to ly and distinctly as possible, and make up your mind that you will not stammer I tried this remedy, and read for two hours aloud with my teeth together. The first result was to make my tongue and iaws ache-that is, while I was reading, -and the next to make me feel as if something had loosened my talking appa enture for I would excel with less distinct
